Software Engineer with 6+ years of experience, currently at Webflow. Previously at Improving (formerly Leniolabs), where I led AI initiatives and contributed to enterprise clients like ICE, helping the team build real capability in LLMs and modern tooling. Founded and run Cool Studio, a design and development agency. Building products on the side: SalvaPatatas, Anfitriio, and every new idea that comes to my mind.

PROFESSIONAL EXPERIENCE

Webflow

Senior Software Engineer

Remote

03/2026 - Present

- Helping democratize web development with AI features.

Improving prev. Leniolabs

Senior Software Engineer - Lead AI Research

Remote

10/2021 - 03/2026

- Orchestrated the coding, testing, and deployment of a micro-frontends architecture for the eFolder app, managing integration across over 12 repositories and facilitating collaboration among multiple teams.
- Designed user-facing features for eFolder, improving product ergonomics and reducing user friction for thousands of global users
- Led the development of an enhanced user interface for the Renderer app, achieving notable gains in performance and user experience that significantly boosted user satisfaction and engagement.
- As the project lead for the eFolder application, I mentored new team members, ensuring effective onboarding and seamless knowledge transfer. This leadership not only maintained high team productivity but also sustained project momentum as we scaled to thousands of users globally. All of these in a remote-first environment.
- Contributed to open-source projects and led internal AI research initiatives, enhancing the company's profile in AI expertise and driving the adoption of it. This role involved synthesizing insights from recent research, implementing findings, and developing proofs of concept that attracted additional clients.
- Currently leading and developing agentic workflows using LLMs to automate complex developer tasks, such as improving the developer experience in the use of internal documents and reducing friction in project management routine tasks. Also, spearheading the Vocale.ai product, aimed at revolutionizing user interactions through voice recognition technology.

Universidad Tecnológica Nacional

Information Systems Engineering - Engineering Master's degree

Chaco, Argentina

03/2022

Universidad Católica de La Plata

Philosophy Degree

Remote, Argentina

03/2024-Present
